**Ichiro** was selected with profit in mind by combining the performance of international breed leading sire **Itozurudo 151** with the proven performance of the maternal genetic powerhouse **Suzutani**. **Suzutani** has proven her genetic merit by being the dam of two international Wagyu breed greats (**Shigeshigetani** and **Sanjirou**). With **Itozurudo 151** as his sire and Suzutani as his maternal granddam Ichiro delivers the best of **marbling** and **growth** for carcasses while also delivering **size** and **milk** for producing breeding stock.

"Proud to be the official agent for World K's Semen in South Africa"

# BPF MS MICH 109 (FB8101) / WORLD K'S HARUKI 2 (FB1614) 5 Embryos

Dam: Ms Mich 109

5 x grade #1 embryos from the mating of BPF Ms Mich, FB8101 (USA) to World K's Haruki II, FB1614 (USA). The Suzutani cow was mated to 3 different bulls (Michifuku, Takazakura, and Haruki II) producing three exceptional sires (Sanjiro, Shigesigetani, and Shikikan). These embryos combine those original 3 bulls that were mated to Suzutani. The pedigree for these embryos is amazing: Haruki II x Michifuku x Takazakura x Suzutani. This mating will provide growth to enhance the breed leading marbling of Suzutani.

These 5 embryos are the only grade #1 embryos from this mating in South Africa.

The \$95,000 in-utero heifer pregnancy that sold at the Australia Elite Sale traces directly on the maternal side to the full sister of Ms Mich's dam.

# STONYRUN SHIG HIKOKURA 15 (FB18908) / WORLD K'S MICHIFUKU

## 5 Embryos

Dam: Stonyrun Shig Hikokura 15

5 x embryos from Stonyrun Shig Hikokura 15 (FB18908) x World K's Michifuku. Hikokura 15 comes from the most elite maternal line of Takeda breeding - the Hikokuras.

This maternal line has produced top Takeda bulls such as TF Itomichi 1/2 and TF149 Mitsuhikokura and more importantly the Australia breeding sensation Mayura Itoshigenami Jnr whose semen sold for \$3000 per straw last year.

These embryos boast the incredible sire stack of Michifuku x Shigesigetani x TF151 Itozurudoi x TF148 Itoshigenami x Itomichi.

The resulting offspring should possess a great balance of marbling and growth.

## KOBE JIROU 6 Semen straws

*Kobe Jirou*

Jirou's Sire is C087 with a terminal index of +\$188.

C087 is a Michifuku son and a Itozurudo TF151 Daughter.

Jirou's Mother is Oasis Moriyama F027 with a Terminal Index of +\$216. She is also a Itoshigenami TF148 Daughter.

Sired by a Michifuku influenced bull, well above the Full-blood Terminal Average who is used to increase mature size and growth without sacrificing marbling. His dam goes back to Itoshigenami, who speaks for itself, the ultimate introduction of marbling fineness.

It is important to note that this semen is of very high standard. In terms of the Stock Improvement act the minimum requirements for frozen semen is 35% progressive sperm and minimum 5 million sperm per dose. Vitality tests are of great significance.

A progressive sperm is not necessary a Vital sperm.

— WORLD K'S MICHIFUKU 1615  
— **SIRE: LAKE WAGYU C087**

## ITOSURUDOI TF151

### 6 Semen straws

*Itozurudoi TF151*

6 x Itozurudoi ETN05 TF151 (Clone)  
FB13044 (USAWA) semen straws.

The 5th clone of Itozurudoi, is known as a fabulous composite bull in the industry.

Itozurudoi TF151 is 50 percent Tajima, 25 percent Fujiyoshi, and 25 percent Kedaka.

He has an extremely big frame, weighs 2,420 lbs., carries early maturing traits that produce great Fullblood mothers with excellent milk. He is the best marbling bull of the Fujiyoshi bloodlines.

Itozurudoi is a fantastic foundation bull, with excellent growth, milk and marbling, and from the best marbling fineness in the breed.

## RECITAL J34

### 6 Semen straws

*Recital J34*

A bull loaded with Big AI genetics in his pedigree. Recital has been an outstanding calf since his birth on 15 Sep 2013. A natural calf with a 35 kg birth weight, he was raised to a weaning weight of 280 Kgs or 616 lbs. He tested free of all genetic disorders. Semen sells for \$60.00AUD.

Recital is beautifully bred. He dam and grand dam have both been exceptional breeders and his sire, a powerful, very quiet bull who weighed over 1000 kgs at 4 years.

Recital was pasture exposed to heifers at 12 months and was out for 3 months coming in at 500 kgs. He continued to do very well and was scanned in February with a 17 month weight of 550 kgs, hip height of 140 cm 55" giving him a frame score of 7, he had a fat score of 5:3 mm, EMA of 81, IMF do 5.4 and testicle measurement of 39 cm.

## TAMBO H18

### 6 Semen straws

*Tambo H18*

Tambo H18 is a slightly differently bred sire being by ACC Tambo E161 and out of a Big AI Daughter. He was the second calf of the attractive Coats E424 and both her bulls have made herd sires. His sire is by Tamamaru out of the great breeding cow KALFB0234 who has bred so many good cattle including the dam of Recital J34. Semen sells for \$50.00AUD.

Tambo H18 went in for semen collection as a yearling and was scanned after coming out of cows in February 15, weight 680 kgs, Fat 7:5, EMA 97, IMF 5.8, Testicles 37 cm. His height was 148 cm or 58" giving him a frame score of 7+.

H18 is an extremely long bull and tall and progeny will grow into a very big carcasses. He has a very fine coat and a quiet temperament.

# KALANGA REDSTAR

## 6 Semen straws

*Kalanga Redstar*

Kalanga Red Star C402 (AUS) has the blood on his sire's side being by Heart Brand Red Star (IMP USA) who in turn is by Shigemaru (IMP JAP) and the imported Japanese "blue hen" MTA Akiko (IMP JAP). MTA Akiko (IMP JAP) is also the dam of two other Akaushi giants in the bulls HB Big AI Q502 (IMP USA) and TWA Kotsukari (IMP USA).

Kalanga Red Star C402 (AUS) as a sire has EBV's that have outperformed his own sire Heart Brand Red Star (IMP USA) and his grand sire the great Shigemaru (IMP JAP). Kalanga Red Star C402 (AUS) brings size, with milk in his females along with added meat production in growth weights. As good as it gets, until he produces a son better than himself.

# TAMAMARU / HIKARI 830

## 5 Embryos

Top: Tamamaru; bottom: Hikari 830

### A: TAMAMARU (Embryo sire - 2x embryos)

A foundation sire backed by the famous cow, Dai 8 Marunami, that was chosen to lead a beef improvement project before she came to America. Tamamaru is a proven sire to add extension and growth in his sons and ideal udder conformation in his daughters. Tamamaru is a maternal sibling to Ringo 117, 518, and a paternal sibling to the foundation cow Dai 9 Kobai 73.

### V7202U: Embryo Dam (Sire B3314R & Dam B0070M)

This cow is line bred Big AI specimen. Out of B3314R a Big AI son from a Shigemaru cross with the very rare Ume dam, also a foundation dam imported from Japan in 1994. Her dam B0070M a Big AI daughter out of the Fuyuko foundation dam also imported from Japan in 1994.

Phenotypically she's a bigger cow that is long bodied and good structured. She generates a lot of performance, balance and structural quality into her offspring.

### B: HIKARI 830 (Embryo Sire - 3x Embryos)

A foundation bull sired by Dai 10 Mitsumaru, national champion for 5 consecutive years in Japan. Hikari is still being used in the Heart Brand herd because his genetics have remained useful to us for almost 20 years. A go-to sire line for calving ease and maternal strength. Hikari will leave his legacy on the breed for a very long time.

### 1099 Z – Embryo Dam (Sire Heart Brand Joe & Dam 8900X)

Joe has been the image of Akaushi cattle marketing for several years. A proven sire of both herd bulls and top end replacement full blood heifers. His temperament is among the best and his daughters make exceptional young cows. Joe is consistent in producing big bodied, good footed and easy handling cattle, combining the best qualities of Shigemaru and Big AI out of Akiko into one modern, proven genetic package. He is out of a foundation grand dam Fuyuko. The Dam 8900X has got all the foundation imports packed into her pedigree – Tamamaru, Big AI, Akiko, Shigemaru and Dai 8 Marunami.

**IIB**

# BIG AL / RAYMOND REDDINGTON

## 5 Embryos

Top: Big Al; bottom: Raymond Reddington

### Big Al (Embryo Sire - 3 x Embryos)

The first bull born outside of Japan and we consider him as a foundation sire. His pedigree combines the highly regarded bulls Dai 10 Mitsumaru and NamimaruTokkyu 87. His dam Akiko is the epitome of cow power and those strengths are apparent in Big Al daughters. Big Al's legacy will be his maternal power. He's a bull that blends calving ease with high volume body type, good milking ability and longevity.

**9882 Y – Embryo Dam** (Sire S4432S & Dam T3939S)

This dam's Sire - S4432S is a Shigemaru son from a royalty dam that was sired by Tamamaru with Big Al and Dai 8 as her grandsires. T3939s is also a Tamamaru daughter from a dam sired by Big Al out of the foundation cow Fuyuko. Very few females have 2 foundation dams stacked into their pedigree. She was born 15 November 2011 and had her first calve at 20 months. Now 4 calves later and pregnant with her 5th at a calving interval of 360 days she is the epitome of fertility.

**Raymond Reddington** (Embryo Sire - 3 x Embryos)

Heartbrand's 20 years of intense selection for quality and productivity is represented in this bull. Raymond is very unique in his build for an Akaushi bull. He combines stout features and massive body-type with eye appeal and balance. His dam, V5909S, is deceased but has produced

**1265 Z – Embryo Dam** (Sire TAMAMARU & Dam H0625N)

She was sired by Tamamaru out of a really unique dam H0625N. She was sired by Hikari out of Dai 10 Mitsumaru, national champion for 5 consecutive years in Japan and bred to the very rare Urme dam, also a foundation dam imported from Japan in 1994. Rare genetics combined with a modern new generation bull.

## Any 6 semen straws

*Terminator at 11 years old*

### TERMINATOR

DOB: 02/08/2006 | REG NO: AF61154

Terminator T3810 is 11 years old and still covering full blood cows. This speaks volumes to his functionality and transmitting ability. He is known for adding power and performance without sacrificing quality and balance. This is a direct son of Tamamaru and out of a Big Al x Fuyuko donor cow. He has produced many sale bulls and top-end keeper heifers that justify his long tenure at Heartbrand.

## JAPANESE BLACK SEMEN

### Any 6 semen straws of the 30 listed

Wagyu Foundation Semen for the Japanese company World K's. They were involved in the original exports of Wagyu cattle from Japan. World K's successfully exported 18 heads in total (4 bulls and 14 heifers). Their successful exports included some of the most well known Wagyu bulls outside of Japan such as Michifuku, Haruki2, Takazakura and Yasufuku Jr. They also exported the influential heifers Suzutani, Okutani and Rikitani.

These bulls are some the most proven genetics in the world with high accuracies (95-98%) on most their EBV's.

## HENSHIN / EMPRESS AKKIKO

### 5 female-sexed embryos

Top: Henshin; bottom: Empress Akkiko

Sire Henshin is large framed, easy going and one of the best bulls among his contemporaries with exceptional EDP's; lots of growth and great breedplan figures. He is in the top 5% of the Australian breed plan for 200 and 600 day weight and top 10% for the 400 day weight. His bloodlines (that trace back to Kaijikari, Hikari and Big Al) are packed with the breeds best red genetics. Dam, Empress Akkiko, is a well-structured female; very correct and one of the biggest framed cows in the Bald Ridge Wagyu program.

## TWA KOTSUKARI

### 6 Semen straws

*TWA Kotsukari*

Extremely rare - A bull whom has the foundation sire Dai 10 Mitsumaru, and the sire of Hikari whom is still being used in the HeartBrand herd because his genetics have remained useful to Heartbrand for almost 20 years. A go-to sire line for calving ease and maternal strength. Kotsukari will leave his legacy on the breed for a very long time.

# WESTHOLME HIRASHIGETAUASU Z278

## 6 Semen straws

*Westholme Hirashigerauasu Z278*

The bull was purchased in 2005 after he sold with his dam at the last sale of Chris Walker before the herd was sold to AA Co. and what an outstanding bull he has become. He is a combination of the three great Westholme bulls, his sire is the great ETJ001 whose sire Dai 20 Hirashige is claimed as one of the top 15 bulls in Japan. His dam is by ETJ003 who in turn was out of a daughter of the high milk and muscle bull ETJ002.

Z278 has grown into a big bull, his weight at the highest being almost 1000 kg., and he is a frame 8. He has been widely used in Australia, North American and Mexico with great results for not only is Z278 the top carcass weight bull in the 2014 Research EBV's but he is a trait leader in growth, milk, testicle size and EMA. Added to that Z278 is AA in the SCD test which test for the fat which melts at a lower temperature and is higher in health values. He has tested free of all genetic disorders and at 10 years of age and after

— WESFU0038 WESTHOLME MORITAKE U38 (IMP USA) (AI) (ET)

many years of natural service is still very sound and fit. Z278 was the sire of the winning carcass in the 2014 Branded Beef Competition - Grass Fed Class.

**AL 5 Wagyu**

Top: Dam BA13-996  
Bottom: Sire PK14-005

This flush from BA 13-996, sired by the legendary Itomoritaka whose sire is Itohirashige, a grandson of Dai 7 Itozakura. Both bulls were produced combining dai 7 Itozakura with cows from the Kedaka line, inheriting good traits from both lines. Itomoritaka gives good growth and frame but combines strong maternal traits. 002 Itomoritaka, after export to the United States was based for semen collection at Hawkeye Breeding Services at Adel, Iowa, USA.

Bred to KIRSTEINS SHIKIKAN Sirlion (PK 14-005). He brings in the heraldability of Takazakara, combined with the legendary marbling ability of Fukutsuru J068 through JVP Fukukane 402E. On the bottom side he has got TF151 which is famous for ribeye-size, bred to a Michifuku cow.

*Hierdie spoeling van BA 13-996, pa van die legendariese Itomoritaka wie se pa Itohirashige, 'n kleinseun van Dai 7 Itozakura is. Altwee bulle is geproduseer deur die Kedata-lyn. Erfgename van goeie karaktertrekke van beide lyne. Itomoritaka gee goeie groei en raam, maar kombineer goeie moederlike karaktereenskappe.*

*002 Itomoritaka se uitvoer na die Verenigde State was gegrond vir semeninsameling by Hawkeye Breeding Services by Ade, Iowa, USA. Teel met KIRSTEINS SHIKIKAN Sirlion (PK 14-005) bring die kwaliteit van Takazakara mee, tesame met die legendariese marmeringsvermoë van Fukutsuru J068 deur JVP Fukukane 402E. Op die onderkant het hy TF151, wat bekend is vir ribeye-grootte, geteël tot 'n Michifuku koei.*

Top: Dam HJ 130013  
Bottom: Sire Woodview 13-0891

This flush from a mutually agreeable sire Woodview 13-0891, an Itoshigenami TF148 son, combined with size and milk from 001, infused by the marbling of 003. Bred to HJ130013 a Tekada Farm Fukutsuru 004 on the top side and Hirashigetayasu on a Goorambat cow sired by the cowmaker TF147.

Take advantage of the cow power, and certainly the marbling and marbling fineness of Itoshigenami TF 148.

*Hierdie spoeling van die besondere bul, Woodview 13-0891, 'n Itoshigenami TF148 seun, gekombineer met grootte en melk van 001, met die kombinasie van die marmering van 003. Geteel na HJ130013 'n Tkada Farm Fukutsuru 004 aan die bokant en Hirashigetayasu op 'n Goorambat koei, geteel by die koemaker-bul, TF147.*

*Neem voordeel van die oordraagbare eienskap van HJ130013 ten opsigte van marmering en veral die gehalte-marmering van Itoshigenami TF148.*

**Wild Plum Wagyu's : Breeding the Benchmark**

**Sire: Aust. Rego #: GRSFF0146 D.O.B  
23/6/2010 B3F, CL16F, CHS.F, F11F**

- His sire, Terutani 40/1 is a bull that leaves milk and size in his daughters. Combining the all round ability of Terutani 40/1 from the Tajima line with the maternal grandsire Itoshigenami TF148 from the Shige Kanenami line. Bringing into the pedigree the famous cow families of Okutani, Suzutani and Rikitani.
- The extra marbling ability added by having TF 148 will make this progeny great for full blood as well as cross breeding.
- Tested FREE of all 5 recessive genes.

**Dam: SA Rego # BA130952 D.O.B  
28/09/2013:**

- Her sire, Woodview Future Investment is a legend in South Africa with a 151 registered progeny. She has Itoshigenami TF 148 influence from the sire's side which translates to fine marbling.
- This dam has size, is thickly made and
